

Super Sized Tracked Stockpilers

13042T

13042T

The Trackstack 13042T is the largest 'mid-mount' tracked stockpiler on the market and is truly in a field of its own. This super sized monster can create stockpiles in excess of 15 metres (50') in height.

Two huge industrial gearboxes give more than enough torque to the 40m (131') long conveyor. This allows direct feeding from a loader or large excavator and ensures a production rate of up to 850+ Tonnes per hour.

The 13042T has been specifically designed to lower operating costs and is especially suited to the high tonnage requirements of high density applications.

Features & Benefits

- 15 metre (50') Stockpile Height with 600+ tonnes per hour production
- 5275 m³ Conical Stockpile Capacity (8440 Tonnes @ 1.6T/m³)
- High powered 130Hp (100Kw) CAT engine with low fuel consumption
- Range of optional extras available
(Contact your local Trackstack representative for details)

Performance Specification

Operating Rate	Stockpile Height	Stockpile Capacity	Conveyor Width	Conveyor Length
600+ TPH*	15,500mm (50' 10")	5275 m ³	1050mm (42")	40,000mm (131')

* Depending on material density and set-up

Dimension Specification

Transport Dimensions			Working Dimensions		
Height	Width	Length	Width	Length	Weight (Est.)
3900mm (12' 9")	2800mm (9' 2")	26,700mm (87' 7")	2800mm (9' 2")	38,200mm (125' 3")	48,000kgs (105,821 lbs)
